

DoD MOU Application Modernization

*Strengthening Partnerships,
Empowering Education*

In partnership with the DANTES staff, the Defense Support Services Center (DSSC) has embarked on a journey to modernize the DoD Memorandum of Understanding (MOU).

By providing user-centered solutions, the modernized platform ensures a more efficient and user-friendly experience for educational institutions. The timeline is subject to change; however, users can anticipate the release of a modernized DoD MOU by late spring/early summer 2025.

What are the benefits of the DoD MOU Application Modernization?

Simplified Data Management and Accuracy

Educational institutions will be able to easily update and maintain accurate program information, reducing administrative burden.

Enhance User Experience

Streamlined workflows and intuitive navigation will improve ease of use, allowing users to find what they need quickly and efficiently.

Effortless MOU Application Management

Institutions will benefit from a simplified MOU application and renewal process, ensuring a smooth and efficient user journey.

Enhanced Compliance with DoD Policies

Educational institutions using the platform will be able to easily adhere to DoD policies and specific requirements through built-in compliance tools.

Enhanced Data Security

Ensure that all user data, including personal and institutional information, is handled securely and in compliance with government data privacy regulations.
